

Voluntary Product Accessibility Template

- **Date:** 11 Oct 2017
- **Product Name:** Zive SM6
- **General Comments:** Information in this VPAT is relevant to Zive SM6 running on a Windows 8 or later. WonATech does not guarantee that the information provided in this document will be error-free, or that any errors will be corrected, or that your use of the information will provide specific results.

Summary Table

Criteria	Supporting Features
Section 1194.21 Software Applications and Operating Systems	Please refer to the attached VPAT
Section 1194.22 Web-based Internet Information and Applications	Not Applicable
Section 1194.23 Telecommunications Products	Not Applicable
Section 1194.24 Video and Multi-media Products	Not Applicable
Section 1194.25 Self-Contained, Closed Products	Not Applicable
Section 1194.26 Desktop and Portable Computers	Not Applicable
Section 1194.31 Functional Performance Criteria	Please refer to the attached VPAT
Section 1194.41 Information, Documentation and Support	Please refer to the attached VPAT

Section 1194.21 Software Applications and Operating Systems – Detail

Criteria	Supporting Features	Remarks and Explanations
(a) When software is designed to run on a system that has a keyboard, product functions shall be executable from a keyboard where the function itself or the result of performing a function can be discerned textually	Partially supported	SM6 enables you to command and control the instrument using a keyboard. The arrow or tab keys can be used to select some sections or to navigate to one menu to another.
(b) Applications shall not disrupt or disable activated features of other products that are identified as accessibility features, where those features are developed and documented according to industry standards. Applications also shall not disrupt or disable activated features of any operating system that are identified as accessibility features where the application programming interface for those accessibility features has been documented by the manufacturer of the operating system and is available to the product developer.	Partially supported	Various accessibility features and assistive applications cannot be disrupted or disabled and will continue to function on top of this application.
(c) A well-defined on-screen indication of the current focus shall be provided that moves among interactive interface elements as the input focus changes. The focus shall be programmatically exposed so that Assistive Technology can track focus and focus changes.	Supported	The keyboard focused dialog boxes can be detected.

<p>(d) Sufficient information about a user interface element including the identity, operation and state of the element shall be available to Assistive Technology. When an image represents a program element, the information conveyed by the image must also be available in text.</p>	Supported	Windows Accessibility API used on Windows operating systems can help users with disabilities to support assistive technologies such as screen readers, screen magnifiers and voice input software.
<p>(e) When bitmap images are used to identify controls, status indicators, or other programmatic elements, the meaning assigned to those images shall be consistent throughout an application's performance.</p>	Supported	
<p>(f) Textual information shall be provided through operating system functions for displaying text. The minimum information that shall be made available is text content, text input caret location, and text attributes.</p>	Supported	
<p>(g) Applications shall not override user selected contrast and color selections and other individual display attributes.</p>	Supported	
<p>(h) When animation is displayed, the information shall be displayable in at least one non-animated presentation mode at the option of the user.</p>	Supported	

(i) Color coding shall not be used as the only means of conveying information, indicating an action, prompting a response, or distinguishing a visual element.	Supported	
(j) When a product permits a user to adjust color and contrast settings, a variety of color selections capable of producing a range of contrast levels shall be provided.	Partially Supported	User can define the color of line and point in graph options dialog.
(k) Software shall not use flashing or blinking text, objects, or other elements having a flash or blink frequency greater than 2 Hz and lower than 55 Hz.	Supported	
(l) When electronic forms are used, the form shall allow people using Assistive Technology to access the information, field elements, and functionality required for completion and submission of the form, including all directions and cues.	Not supported	

Section 1194.31 Functional Performance Criteria – Detail

Criteria	Supporting Features	Remarks and Explanations
(a) At least one mode of operation and information retrieval that does not require user vision shall be provided, or support for Assistive Technology used by people who are blind or visually impaired shall be provided.	Partially supported	SM6 works with Narrator, screen reader utility included in Microsoft Windows, which is designed for the visually impaired.
(b) At least one mode of operation and information retrieval that does not require visual acuity greater than 20/70 shall be provided in audio and enlarged print output working together or independently, or support for Assistive Technology used by people who are visually impaired shall be provided.	Partially supported	SM6 works with Magnifier, a tool that included in Microsoft Windows. It enlarges parts or all of the screen. Words and images can be better seen.
(c) At least one mode of operation and information retrieval that does not require user hearing shall be provided, or support for Assistive Technology used by people who are deaf or hard of hearing shall be provided	Supported	SM6 does not require hearing for use.
(d) Where audio information is important for the use of a product, at least one mode of operation and information retrieval shall be provided in an enhanced auditory fashion, or support for assistive hearing devices shall be provided.	Not Applicable	No audio information is used.

<p>(e) At least one mode of operation and information retrieval that does not require user speech shall be provided, or support for Assistive Technology used by people with disabilities shall be provided.</p>	<p>Supported</p>	<p>User speech is not used in SM6.</p>
<p>(f) At least one mode of operation and information retrieval that does not require fine motor control or simultaneous actions and that is operable with limited reach and strength shall be provided.</p>	<p>Supported</p>	<p>Instead of using a mouse, the keyboard keys can be used to control the mouse pointer.</p>

Section 1194.41 Information, Documentation and Support – Detail

Criteria	Supporting Features	Remarks and Explanations
(a) Product support documentation provided to end-users shall be made available in alternate formats upon request, at no additional charge	Supported	Online documentation can be downloaded at www.wonatech.com after user login.
(b) End-users shall have access to a description of the accessibility and compatibility features of products in alternate formats or alternate methods upon request, at no additional charge.	Supported	Information about product accessibility and compatibility is available at: http://www.zivelab.com/info.php?id=suppacc
(c) Support services for products shall accommodate the communication needs of end users with disabilities.	Supported	Email support is available at: www.wonatech.com . Select Contact Us > Technical support. A proper solution will be provided to the user by email or phone.
